

Please reject NAB's petition 04-160.  
Please don't be swayed by the lobbyist who are selfishly trying to protect their own empire. Let the people decide. I willingly choose to pay a subscription fee to receive quality programming including instant traffic and weather via satellite radio. It provides a variety of quality programming coast to coast that is not available elsewhere.

I don't want to wait through 15 minutes of drivel and commercials from an off-the-air radio station just to find out if there's been an accident or it's going to rain on my way to work. My time is more valuable than that and I'm willing to pay for the convenience of satellite radio traffic and weather. The National Association of Broadcasters should not be allowed to dictate what I am permitted to hear.

Please support free enterprise and free speech and allow the American public to determine how they should receive this content.
